Land Mobile Radio Modulation and Signal Analyzer, Vector Network Analyzer, and Spectrum Analyzer

## S412E

9 kHz to 1.6 GHz Spectrum Analyzer 500 kHz to 1.6 GHz Vector Network Analyzer

#### Introduction

The S412E is Anritsu's second generation solution for installing and maintaining public safety systems. Built on Anritsu's ninth generation handheld platform, the S412E combines a high performance receiver/spectrum analyzer with the world's most advanced handheld vector network analyzer plus a powerful vector signal generator with internally adjustable power from 0 dBm to -130 dBm.

| <ul> <li>Land Mobile Radio Signal Analyzer Highlights <ul> <li>Analyzes Narrowband FM analog systems</li> </ul> </li> <li>Analyzes P25 (TIA-102.CAAA-C), P25 Phase 2 (TIA-102.CCAA), DMR (MOTOTRBO™)<sup>a</sup>, NXDN™, dPMR, PTC-ITCR, PTC-ACSES, and TETRA digital systems</li> <li>100 kHz to 1.6 GHz frequency coverage (Optional extension to 6 GHz)</li> <li>Internal signal generator: 0.1 dB resolution, 0 dBm to – 130 dBm (spec to –120 dBm)</li> </ul> a.Supports those features compliant with the ETSI DMR standard. | <ul> <li>2.0 dB signal generator accuracy (typical)</li> <li>P25/P25p2, NXDN, and ETSI DMR BER test patterns including 1011, 1031, and V.52/O.153</li> <li>Duplex test: Simultaneous analysis and generation of analog or digital LMR signals</li> <li>Independent control of both receive/transmit frequencies and test patterns</li> <li>TETRA Base Station Receiver Sensitivity Measurements</li> </ul> |
|--|--|
| <ul> <li>Spectrum Analyzer Highlights</li> <li>Measurements: Occupied Bandwidth, Channel Power,<br/>ACPR, C/I, Coverage Mapping</li> <li>Interference Analyzer: Spectrogram, Signal Strength, RSSI,<br/>Mapping</li> <li>9 kHz to 1.6 GHz frequency coverage (Optional extension to<br/>6 GHz)</li> </ul>  | <ul> <li>Dynamic Range: &gt; 95 dB in 10 Hz RBW</li> <li>DANL: -152 dBm in 10 Hz RBW</li> <li>Phase Noise: -100 dBc/Hz max @ 10 kHz offset at 1 GHz</li> <li>Frequency Accuracy: ±1.2 x 10<sup>-7</sup> +aging; &lt;±5.0 x 10<sup>-8</sup> with GPS on, 3 minutes after satellite is locked in selected mode</li> <li>PIM Hunting</li> </ul>   |
| <ul> <li>VNA Analyzer Highlights</li> <li>1-path, 2-port Vector Network Analyzer (VNA) w/ quad trace display</li> </ul>  | <ul> <li>Outstanding calibration stability, up to 16 hours</li> <li>Arbitrary data points up to 4001</li> </ul>  |

- 500 kHz to 1.6 GHz frequency coverage (Optional extension to 6 GHz)
- Intuitive Graphical User Interface (GUI) with convenient touchscreen
- VNA-quality error correction for directivity and source match

#### **Signal Generator Highlights**

- 500 kHz to 1.6 GHz CW/FM/AM Modulation
- FM, 100 Hz to 10 kHz rate, adjustable deviation
- AM, 100 Hz to 10 kHz rate, adjustable depth

#### **Capabilities and Functional Highlights**

- Analog FM and digital LMR analyzer
- High accuracy internal power meter
- On-screen LMR Coverage Mapping (Outdoor and Indoor)
- GPS tagging of saved traces
- USB data transfer
- Complies with MIL-PRF-28800F Class 2 and MIL-STD-810G
- Certified for use in Explosive Atmosphere per MIL-PRF-28800F 8.4 inch daylight-viewable TFT LCD color resistive touchscreen – allows use while wearing gloves
- Touchscreen keyboard
- USB and Ethernet data transfer
- Web Remote Control
- Master Software Tools<sup>™</sup>
- 3 hour battery operation time

• 0.1 dB resolution, 0 dBm to -130 dBm

IF Bandwidth selections of 10 Hz to 100 kHz

• 100 dB transmission dynamic range

• 850 μs/data point sweep speed

• CW, FM with CTCSS/DCS/DTMF, FM with CTCSS/DCS/DTMF + Tone Modulation, FM + Tone Modulation

LMR Master™ S412E featuring 8.4 inch Daylight Viewable Touchscreen Compact Size: 273 mm x 199 mm x 91 mm, (10.7 in x 7.8 in x 3.6 in), Lightweight: 3.6 kg, (7.9 lb)

#### **Table of Contents**

| Spectrum Analyzer  | 4  |
|--|----|
| Vector Network Analyzer  | 6  |
| Interference Analyzer (Option 25)  | 11 |
| Channel Scanner (Option 27)  |    |
| GPS Receiver (Option 31)   | 11 |
| Ethernet Connectivity  | 11 |
| Coverage Mapping (Option 431)  | 12 |
| Electromagnetic Field Test (Option 444)                                  | 12 |
| CW Signal Generator  | 12 |
| Internal Power Meter   |    |
| High Accuracy Power Meter (Option 19)                                    | 13 |
| NBFM Analyzer and Coverage Mapping                                       | 14 |
| P25/P25p2 Analyzer and P25/P25p2 Talk-Out Coverage (Options 521 and 522) | 15 |
| P25/P25p2 Signal Generator   | 16 |
| DMR (MOTOTRBO) Analyzer and DMR Talk-Out Coverage (Options 591 and 592)  | 17 |
| dPMR Analyzer (Options 573 and 572)                                      | 18 |
| NXDN Analyzer and NXDN Talk-Out Coverage (Options 531 and 532)           | 19 |
| TETRA Analyzer and TETRA Coverage Mapping (Options 581 and 582)          | 20 |
| TETRA Signal Generator   | 20 |
| PTC-ITCR Analyzer and PTC-ITCR Talk-Out Coverage (Options 721 and 722)   |    |
| PTC-ACSES Analyzer and PTC ACSES Talk-Out Coverage (Options 731 and 733) | 22 |
| AM/FM/PM Signal Analyzers (Option 509)                                   |    |
| LTE Signal Analyzers (Options 541, 542, 546, and 886)                    | 24 |
| TDD LTE Signal Analyzers (Options 551, 552, and 556)                     |    |
| GSM/GPRS/EDGE Measurements (Option 880)                                  |    |
| IEEE 802.16 Fixed WiMAX Signal Analyzers (Options 46 and 47)             |    |
| IEEE 802.16 Mobile WiMAX Signal Analyzers (Options 66, 67, and 37)       |    |

#### Definitions

|                     | All specifications and characteristics apply to Revision 4 instruments under the following conditions, unless otherwise noted:   |
|---------------------|--|
| Warm-Up Time        | After 15 minutes of warm-up time in VNA mode, where the instrument is left in the ON state.  |
| Temperature Range   | Over the 23 °C $\pm$ 5 °C temperature range, unless otherwise noted.   |
| Reference Signal    | When using internal reference signal.  |
| Typical Performance | Typical specifications that are not in parenthesis are not tested and not warranted. They are generally<br>representative of characteristic performance. Typical specifications in parenthesis () represent the mean<br>value of measured units and do not include any guard-bands or uncertainties. They are not warranted. |
| Uncertainty         | A coverage factor of x1 is applied to the measurement uncertainties to facilitate comparison with other industry handheld analyzers.   |
| Calibration Cycle   | Calibration is within the recommended 12 month period (residual specifications also require calibration kit calibration cycle adherence.)  |
|                     | All specifications subject to change without notice. For the most current data sheet, please visit the Anritsu web site: www.anritsu.com   |

| Measurements         |   |
|----------------------|---|
| Smart Measurements   | Field Strength (uses antenna calibration tables to measure dBm/m <sup>2</sup> or dBmV/m)  |
|                      | Occupied Bandwidth (measures 99% to 1% power channel of a signal)   |
|                      | Channel Power (measures the total power in a specified bandwidth)   |
|                      | ACPR (Adjacent Channel Power Ratio)   |
|                      | AM/FM/SSB Audio Demodulation (Wide/Narrow FM, AM, Upper/Lower SSB)  |
|                      | C/I (carrier-to-interference ratio)   |
|                      | Emission Mask   |
|                      | Coverage Mapping (requires option 431)  |
|                      | PIM Alert Application (available for download)  |
|                      | PIM Hunting   |
| Setup Parameters     |   |
| Frequency            | Center/Start/Stop, Span, Frequency Step, Signal Standard, Channel #, Channel Increment  |
| Amplitude            | Reference Level (RL), Scale, Attenuation Auto/Level, RL Offset, Preamp On/Off, Detection  |
| Span                 | Span, Span Up/Down (1-2-5), Full Span, Zero Span, Last Span   |
| Bandwidth            | RBW, Auto RBW, VBW, Auto VBW, RBW/VBW, Span/RBW   |
| File                 | Save, Save-on-Event, Recall, Copy, Delete   |
| Save                 | Setups, Measurements, Screen Shots (JPEG), Limit Lines, Spurious Emission Mask  |
| Save-on-Event        | Crossing Limit Line, Sweep Complete, Save-then-Stop, Clear All  |
| Recall               | Setups, Measurements, Limit Lines, Spurious Emission Mask   |
| Сору                 | Selected file or files to internal/external memory (USB)  |
| Delete               | Selected file or files from internal/external memory (USB)  |
| Application Options  | Bias-Tee On/Off, Impedance (50 $\Omega$ , 75 $\Omega$ , Other)  |
| Sweep Functions      |   |
| •<br>Sweep           | Single/Continuous, Manual Trigger, Reset, Detection, Minimum Sweep Time, Trigger Type   |
| Detection            | Peak, RMS, Negative, Sample, Quasi-peak   |
| Triggers             | Free Run, External, Video, Change Position, Manual  |
| Trace Functions      |   |
| Traces               | Up to three Traces (A, B, C), View/Blank, Write/Hold, Trace A/B/C Operations  |
| Trace A Operations   | Normal, Max Hold, Min Hold, Average, # of Averages, (always the live trace)   |
| Trace B Operations   | $A \rightarrow B, B \leftrightarrow C, Max Hold, Min Hold$  |
| Trace C Operations   | $A \rightarrow C$ , $B \leftrightarrow C$ , Max Hold, Min Hold, $A - B \rightarrow C$ , $B - A \rightarrow C$ , Relative Reference (dB), Scale  |
| Marker Functions     |   |
| Markers              | Markers 1-6 each with a Delta Marker, or Marker 1 Reference with Six Delta Markers, Marker Table On/C<br>All Markers Off  |
| Marker Types         | Style (Fixed/Tracking), Noise Marker, Frequency Counter Marker, Marker Auto-Position Peak Search,<br>Next Peak (Right/Left), Peak Threshold %, Set Marker to Channel, Marker Frequency to Center, Delta Mar<br>to Span, Marker to Reference Level |
| Marker Table         | 1-6 markers frequency and amplitude plus delta markers frequency offset and amplitude   |
| Limit Line Functions |   |
| Limit Lines          | Upper/Lower, On/Off, Edit, Move, Envelope, Advanced, Limit Alarm, Default Limit   |
| Limit Line Edit      | Frequency, Amplitude, Add Point, Add Vertical, Delete Point, Next Point Left/Right  |
| Limit Line Move      | To Current Center Frequency, By dB or Hz, To Marker 1, Offset from Marker 1   |
| Limit Line Envelope  | Create Envelope, Update Amplitude, Points (41 max), Offset, Shape Square/Slope  |
| Limit Line Advanced  | Type (Absolute/Relative), Mirror, Save/Recall   |

#### **IIII** Spectrum Analyzer Performance

#### Frequency

| Frequency                                    |   |  |                             |                        |
|--|---|--|-----------------------------|------------------------|
| Frequency Range                              | 9 kHz to 1.6 GHz, (6 GHz  | with Option 6)   |                             |                        |
| Tuning Resolution                            | 1 Hz  |  |                             |                        |
| Frequency Reference Aging                    | ±1.0 x 10 <sup>-6</sup> per year  |  |                             |                        |
| Frequency Reference Accuracy                 | $\pm 1.2 	ext{ x } 10^{-7} (\pm 25 \text{ °C})$ + aging, standard < $\pm 5.0 	ext{ x } 10^{-8}$ with GPS on, 3 minutes after satellite is locked in selected mode |  |                             |                        |
| Frequency Span                               | 10 Hz to 1.6 GHz including zero span (10 Hz to 6 GHz with Option 6)   |  |                             |                        |
| Sweep Time                                   | 100 ms min, 7 μs to 3600  | 5 1 1  |                             |                        |
| Sweep Time Accuracy                          | ± 2% in zero span   |  |                             |                        |
| Bandwidth                                    |   |  |                             |                        |
| Resolution Bandwidth (RBW)                   | 10 Hz to 3 MHz in 1–3 se  | quence ± 10% (1 MHz max i                                | n zero span) (–3 dB bandwid | th)                    |
| Video Bandwidth (VBW)                        | 1 Hz to 3 MHz in 1–3 seq  | uence (–3 dB bandwidth) (au                              | uto or manually selectable) |                        |
| RBW with Quasi-Peak Detection                | 200 Hz, 9 kHz, 120 kHz (-   | -6 dB bandwidth)   |                             |                        |
| VBW with Quasi-Peak Detection                | Auto VBW is On, RBW/VE  | 3W = 1   |                             |                        |
| Spectral Purity                              |   |  |                             |                        |

#### 🎯 Vector Network Analyzer

#### **Block Diagram**

As shown in the following simplified block diagram, the LMR Master has a 2-port, 1-path architecture that automatically measures two S-parameters with error-correction precision inherent to VNA operation. The magnitude and phase information gained from vector network data enables the LMR Master to make significant error corrections and provide improved field measurements.

#### Frequency

Frequency Range Frequency Accuracy Frequency Resolution

ge 500 kHz to 1.6 GHz (500 kHz to 6.0 GHz with Option 16) icy 2.5 ppm on 1 Hz

#### Test Port Power (Typical)

LMR Master supports selection of High, Default, or Low test port power. Changing power after calibration can degrade the calibrated performance. Typical test port power by bands is shown in the following table.

| Frequency Range         | High Port Power | Default Port Power | Low Port Power |
|-------------------------|-----------------|--------------------|----------------|
| 500 kHz to $\leq$ 3 GHz | +3 dBm          | –5 dBm             | –25 dBm        |
| 3 GHz to $\leq$ 6 GHz   | 0 dBm           | –5 dBm             | –25 dBm        |

#### Transmission Dynamic Range

The transmission dynamic range (the difference between test port power and noise floor) using 10 Hz IF Bandwidth and High Port Power:

| 2 MHz to $\leq$ 4 GHz | 100 dB |
|-----------------------|--------|
| 2 MHz to $\leq$ 4 GHz | 100 dE |

| 4 GHz to $\leq$ 6 GHz | 90 dB |
|-----------------------|-------|
|                       |       |

#### Sweep Speed (Typical)

The two-receiver architecture will simultaneously collect  $S_{21}$  and  $S_{11}$  in a single sweep. The typical sweep speed for IF Bandwidth of 100 Hz, 1001 data points, and single display is:

Frequency Range500 kHz to 6 GHzTypical Sweep Speed850 μs / point

Noise Floor (Typical)

 Full 1-path, 2-port forward path calibration with isolation, high power, 10 Hz IFBW, no averaging, 10 minute warm-up. TOSLK50A-20, TOSLKF50A-20 calibration kit. Reflection and Transmission Tracking are typical.

#### Vector Network Analyzer (Continued)

**Bias Tee (Option 10)** For tower mounted amplifier tests, the S412E with optional internal bias tees can supply both DC and RF signals on the center conductor of the cable during measurements. For frequency sweeps in excess of 2 MHz, the LMR Master can supply internal voltage control from +12 to +32 V in 0.1 V steps up to 450 mA. Bias is available on VNA Port 2 and the SPA Input (RF In) for use with antenna preamplifiers.

Frequency Range 2 MHz to 4/6 GHz at VNA Port 2 Internal Voltage/Current +12 V to +32 V at 450 mA (Steady state) Internal Resolution 0.1 V Bias Tee Selections Internal, Off

The Compact LMR Master offers optional integrated bias tee for supplying DC plus RF to the DUT as shown in this simplified block diagram.

#### Vector Voltmeter (Option 15)

A phased array system relies on phase matched cables for nominal performance. For this class of application, the LMR Master offers this special software mode to simplify phase matching cables at a single frequency. The similarity between the popular vector voltmeter and this software mode ensures minimal training is required to phase match cables. Operation is as simple as configuring the display for absolute or relative measurements. The easy-to-read large fonts show either reflection or transmission measurements using impedance, magnitude, or VSWR readouts. For instrument landing system (ILS) or VHF Omni-directional Range (VOR) applications, a table view improves operator efficiency when phase matching up to twelve cables. The S412E solution is superior because the signal source is included internally, precluding the need for an external signal generator.

#### **Distance Domain**

Distance-to-Fault Analysis is a powerful field test tool to analyze cables for faults, including minor discontinuities that may occur due to a loose connection, corrosion, or other aging effects. By using Frequency Domain Reflectometry (FDR), the VNA's DTF mode exploits a user-specified band of full power operational frequencies (instead of DC pulses from TDR approaches) to more precisely identify discontinuities. The VNA converts S-parameters from frequency domain into distance domain on the horizontal display axis, using a mathematical computation called Inverse Fourier Transform. Connect a reflection at the opposite end of the cable and the discontinuities appear versus distance to reveal any potential maintenance issues. When access to both ends of the cable is convenient, a similar distance domain analysis is available on transmission measurements.

Distance Domain will improve your productivity with displays of the cable in terms of discontinuities versus distance. This readout can then be compared against previous measurements (from stored data) to determine whether any degradations have occurred since installation (or the last maintenance activity). More importantly, you will know precisely where to go to fix the problem and minimize or prevent downtime of the system.

| Maximum Distance                                     |                      |
|--|----------------------|

| 2000-1800-R       | 9 kHz to 300 MHz |
| 2000-1792-R       | 30 MHz to 3 GHz  |
| 2000-1791-R       | 700 MHz to 6 GHz |
|                   |                  |

#### Modes where EMF Measurements Available

Spectrum Analyzer

LTE OTA (Option 546)

#### 째 CW Signal Generator

| Setup Parameters     |  |
|----------------------|--|
| Generator            | On/Off   |
| Tx Output Level      | 0.1 dB resolution, 0 dBm to –130 dBm (spec to –120 dBm)                          |
| Tx Pattern           | CW, AM w/ 1 kHz, FM w/ 1 kHz   |
| RF Characteristics   |  |
| Power Level Accuracy | 2.0 dB (CW Pattern, temperature range 15 °C to 35 °C, –120 dBm to 0 dBm) typical |
| Frequency Range      | 500 kHz to 1.6 GHz   |
| Frequency Accuracy   | Same as Spectrum Analyzer  |

#### **Internal Power Meter**

| Frequency<br>Amplitude | Center/Start/Stop, Span, Frequency Step, Signal Standard, Channel #, Full Band<br>Maximum, Minimum, Offset, Relative On/Off, Units, Auto Scale |  |  |  |
|------------------------|--|--|--|--|
| Average                | Acquisition Fast/Med/Slow, # of Running Averages   |  |  |  |
| Limits                 | Limit On/Off, Limit Upper/Lower  |  |  |  |
| Frequency Range        | 10 MHz to 1.6 GHz (Standard), 10 MHz to 6 GHz (Option 6)   |  |  |  |
| Span                   | 1 kHz to 100 MHz   |  |  |  |
| Display Range          | –140 dBm to +30 dBm, ≤ 40 dB span  |  |  |  |
| Measurement Range      | –120 dBm to +26 dBm  |  |  |  |
| Offset Range           | 0 dB to +100 dB  |  |  |  |
| VSWR                   | 2:1 typical  |  |  |  |
| Maximum Power          | Same as RF In Damage Level   |  |  |  |
| Accuracy               | Same as Spectrum Analyzer  |  |  |  |
| Application Option     | Impedance (50 $\Omega$ , 75 $\Omega$ , Other)  |  |  |  |

#### Bigh Accuracy Power Meter (Option 19) (Requires external USB power sensor, sold separately)

Notes:

a. Expanded uncertainty with K=2 for power measurements of a CW signal greater than +20 dBm with a matched load. Measurement results referenced to the input side of the sensor.

b. Total RSS measurement uncertainty (0 °C to 50 °C) for power measurements of a CW signal greater than -20 dBm with zero

noise.

#### Line Sweep Tools (for your PC)

**Features** Line Sweep Tools (LST) is a free PC based program that increases productivity for people who deal with numerous Cable and Antenna traces every day. LST is the next generation of Anritsu's familiar Handheld Software Tools (HHST) and shares its uncomplicated user interface, giving a new face to the term "ease of use."

| Report Setup                      | Report Title, Company, Prepared for, Location, Date and Time, Filename, Company logo (optionally set b           |
| Report Setup                      | Report Title, Company, Prepared for, Location, Date and Time, Filename, Company logo (optionally set to<br>user) |
| Trace Setup                       | One Trace Portrait Mode, Two Trace Portrait Modes, One Trace Landscape Mode                                      |
| Trace Validation                  |  |
| Presets                           | Seven presets allow "one click" setting of up to 6 markers and one limit line                                    |
| Marker Controls                   | Six regular Markers, Marker Peak, Marker Valley, Marker between, and frequency entry                             |
| Delta Markers                     | Six Delta markers  |
| Limit Line                        | Enable and drag or value entry. Also works with presets  |
|                                   |  |
| Next Trace Button                 | Next Trace and Previous Trace arrow keys allow quick switching between traces                                    |
| Tools                             |  |
| Cable Editor                      | Allows creation of custom cable parameters (instrument type/model must match original)                           |
| Distance to Fault                 | Converts a Return Loss trace to a Distance to Fault trace (only *.dat and *.vna file types supported)            |
| Measurement Calculator            | Converts Real, Imaginary, Magnitude, Phase, RL, VSWR, Rho, and Transmit power                                    |
|                                   |  |
| Signal Standard Editor            | Creates new band and channel tables (instrument type/model must match original)                                  |
| Renaming Grid                     | 36 user definable phrases for creation of file names, trace titles, and trace subtitles                          |

#### Web Remote Control

| Full instrument control through a browser – all instrument functions except power switch and rotary knob  |
|---|
| RJ45 Ethernet jack  |
| Third party Wi-Fi router  |
| НТТР/ТСР/ІР   |
| Cat 5 Cable, Wi-Fi router compatible  |
| HTML 5-compliant browser – Google Chrome, Mozilla Firefox   |
| iOS, Windows, Linux, Android operating systems that can host the HTML 5-compliant browser   |
| PCs, tablets, and smart phones with Ethernet or Wi-Fi connection and an HTML 5-compliant browser  |
| Individual instrument files downloaded via browser<br>Multiple instrument files and directories zipped and downloaded via browser<br>File downloads are not supported by iOS<br>Screen capture capability |
| Normal: All modes and displays supported<br>Fast: Spectrum traces update faster (up to five updates per second)   |
| The instrument can be password protected<br>Passwords may be used to manage who is controlling the instrument   |
| One user/device can view and control many instruments   |
|   |

#### **Programmable Remote Control**

| Functionality        | Many instrument functions are programmable. See the Programming Manual for details. |
|----------------------|---|
| Programming Language | Standard Commands for Programmable Instruments (SCPI)                               |
| Interfaces           | Ethernet, USB   |
| Available Drivers    | LabView. Visit NI.com for driver  |

|                   | 806 MHz to 869 MHz, N(m) to SMA(f), 50 $\Omega$                       |  |
|                   | 1030-109-R  |  |
|                   | 824 MHz to 849 MHz, N(m) to SMA(f), 50 $\Omega$                       |  |
|                   | 1030-110-R  |  |
|                   | 880 MHz to 915 MHz, N(m) to SMA(f), 50 $\Omega$                       |  |
|                   | 1030-105-R  |  |
|                   | 890 MHz to $$ 915 MHz Band, 0.41 dB loss, N(m) to SMA(f), 50 $\Omega$ |  |
|                   | 1030-111-R  |  |
|                   | 1850 MHz to 1910 MHz, N(m) to SMA(f), 50 $\Omega$                     |  |
|                   | 1030-106-R  |  |
|                   | 1710 MHz to 1790 MHz Band, 0.34 dB loss, N(m) to SMA(f), 50 $\Omega$  |  |
| the second second | 1030-107-R  |  |
|                   | 1910 MHz to 1990 MHz Band, 0.41 dB loss, N(m) to SMA(f), 50 $\Omega$  |  |
|                   | 1030-112-R  |  |
|                   | 2400 MHz to 2484 MHz, N(m) to SMA(f), 50 $\Omega$                     |  |
|                   | 1030-149-R  |  |
|                   | High Pass, 150 MHz, N(m) to N(f), 50 $\Omega$                         |  |
|                   | 1030-150-R  |  |
|                   | High Pass, 400 MHz, N(m) to N(f), 50 $\Omega$                         |  |
|                   | 1030-151-R  |  |
|                   | High Pass, 700 MHz, N(m) to N(f), 50 $\Omega$                         |  |
|                   | 1030-152-R  |  |
|                   | Low Pass, 200 MHz, N(m) to N(f), 50 $\Omega$                          |  |
|                   | 1030-153-R  |  |
|                   | Low Pass, 550 MHz, N(m) to N(f), 50 $\Omega$                          |  |
|                   | 1030-155-R  |  |
|                   | 2500 MHz to 2700 MHz, N(m) to N(f), 50 $\Omega$                       |  |

#### Attenuators Accessory Description

1010-121-R 40 dB, 100 W, DC to18 GHz, N(f) to N(m), Uni-directional

3-1010-122 20 dB, 5 W, DC to 12.4 GHz, N(m) to N(f)

3-1010-123 30 dB, 50 W, DC to 8.5 GHz, N(m) to N(f)

3-1010-124 40 dB, 100 W, DC to 8.5 GHz, N(f) to N(m), Uni-directional

Description

42N50-20 20 dB, 5 W, DC to 18 GHz, N(m) to N(f)

42N50A-30 30 dB, 50 W, DC to 18 GHz, N(m) to N(f)

1010-127-R 30 dB, 150 W, DC to 3 GHz, N(m) to N(f)

1010-128-R 40 dB, 150 W, DC to 3 GHz, N(m) to N(f)
