## D6025 Series Multi-Axis Positioner

---

---

## Features and Specifications

---

# Introduction

## Overview

The D6025 is a highly versatile and ultra-accurate multi-axis positioner system suited for most antennas. The standard D6025 package consists of a 2-axis positioner, our powerful DAMS software suite, precision RF cables and rotary joints, all tools and documentation, plus DUT mounting hardware and more. All of this is backed with our 3-year warranty.

## Measurement Capabilities

- Far Field (gain, beamwidth, efficiency, directivity, radiation patterns, RCS, and more!)
- 2D & 3D Spherical Measurements (AZ over EL, AZ over EL over freq, and more!)
- Spherical Near Field (optional)
- Phase Center Measurements

## Highlights

- Multiple configuration options
- Indexable mast offset up to 23" from center
- Non-metallic DUT mounting axis
- Ultra-high precision (up to 0.02°)
- Ideal for most antennas up to 25 pounds

## Configurable Models / Options

The D6025 platform is capable of operation from DC to 67 GHz with standard coaxial components and DC up to 110 GHz with waveguide components. Other upgrades and options include automated Z-axis, auto-polarization switch, or high-precision worm-driven non-metallic head upgrade. The D6025 can also be configured to include up to 5-axes as well. [Complete](#) turnkey packages also available including network analyzer, reference horn, laptop, etc.

# Specifications

## Positioner

### Turntable

Frequency Ranges (GHz):	Coax: DC to 6, 18, 40, 50, or 67 mmW: DC to 75 (V-Band), 90 (E-Band) or 110 (W-Band)
Resolution:	0.025°
Drivetrain:	Precision belt-drive with 1.8° stepper motor
Gear Ratio:	72:1
Movement Range:	0-360° or ± 180° (re-indexable hardware limits)
Communication Options:	12-channel slip ring (standard, other options available)
Position Feedback:	Optional encoder (default open loop, position tracked by software)
Weight (positioner only):	40 lbs (18 kg) with slide rails
Positioner Max Speed:	2 RPM (12° per second)
AUT Mounting Options: <sup>1</sup>	18" (46 mm) diameter acrylic plate, 0.750" thick
Weight Capacity:	Centered: 75 lbs (34 kg); distributed: 100 lbs (45.4 kg)
RF Rotary Joint:	Precision, low-noise rotary joint (SMA, 2.92, 2.4, or 1.85 mm)

### Roll / Phi Axis

Frequency Ranges:	Coax: DC - 6, 18, 40, 50, or 67 GHz mmW: DC - 75 (V-Band), 90 (E-Band) or 110 (W-Band) GHz
Resolution:	0.05°
Drivetrain:	Belt driven with 1.8° stepper motor
Gear Ratio:	36:1 with precision planetary reducer
Movement Range:	360° continuous or ± 180°
Positioner Max Speed:	4 RPM (24° per second)
Position Feedback:	Optional encoder (default open loop, position tracked by software)
Weight (mast only):	22 lbs (10 kg)
AUT Mounting Options: <sup>1</sup>	4.5" (115 mm) diameter PVC mounting plate with 10-32 hole array
Weight Capacity:	25 lbs (11.4 kg)
Axial Moment Capacity:	20 ft-lbs (27 Nm, 2.75 m-kg)
Lateral Moment Capacity:	10 ft-lbs (13.5 Nm, 1.35 m-kg)
RF Rotary Joint:	Precision, low-noise rotary joint (SMA, 2.92, 2.4, or 1.85 mm)

## Electrical & Communications

Controller type:	Internal 3-axis microprocessor-based controller
Resolution:	Up to 1/32nd microstepping
Motor current:	3.125A per motor phase
Cooling:	Dual 24V fans
Communication interface:	9-pin D-Sub RS-232 (adapter included)
Included cable length:	10 feet (3 meters)
Input voltage:	24VDC 5A - 2.5 mm DC barrel connector
Power supply:	24VDC 5A, 110V / 220V input (included)

<sup>1</sup> = Custom solutions available upon request

## Standard Models

---

D6025-00	No RF Components
D6025-06	6 GHz SMA RF Components
D6025-18	18 GHz SMA RF Components
D6025-40	40 GHz 2.92 mm RF Components
D6025-50	50 GHz 2.4 mm RF Components
D6025-67	67 GHz 1.85 mm RF Components
D6025-75	75 GHz mmW V-Band RF Components
D6025-90	90 GHz mmW E-Band RF Components
D6025-110	110 GHz mmW W-Band RF Components
D6025-MMW-CFX	No RF components; configured with mounts for Copper Mountain FX series mmW adapters (up to 110 GHz)

## Additional Options

---

DEPC-D	Pre-configured PC (desktop)
DEPC-L	Pre-configured PC (laptop)
DE-SIM	DAMS Antenna & Network Simulator software add-on
OPT-POL18	18 GHz SPDT RF switch auto-polarizer with cables/adapters
OPT-POL40	40 GHz SP4T RF switch auto-polarizer with cables/adapters
OPT-MP10	10" mounting plate for roll/phi axis
OPT-SR0	No slip ring (for limited $\pm 180^\circ$ rotations only, not for $360^\circ$ )
OPT-2A	Worm-gear driven head
OPT-3A	Automated Z-axis
OPT-4A	Automated Z- and X-axis with pseudo Y-axis
OPT-5A	Encoder feedback capability
DPA-PDK	DAMS Platform Development Kit

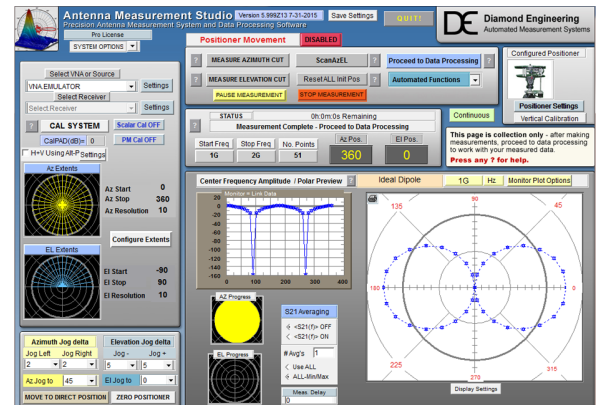

# DAMS Antenna Measurement Studio

## Overview

The DAMS antenna measurement studio is a data collection platform with various semi-automatic modules for post-processing DUT data. The DAMS software is capable of generating various reports and visual data representations ranging from 3D spherical plots, gain over frequency plots, Smith charts and more, contingent upon user requirements—the ideal compliment to the D6025.

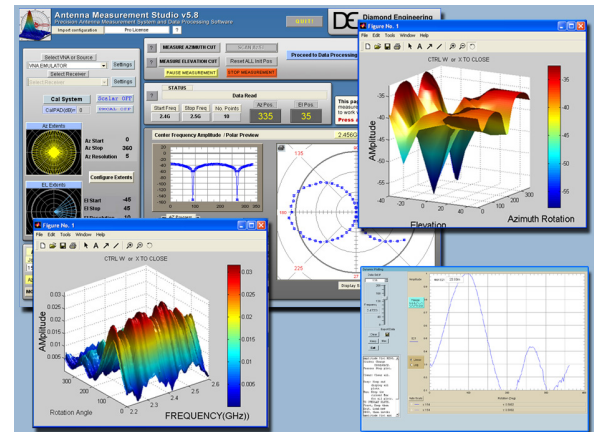

## Measurement Features

- Support for power meters, voltmeters, spectrum analyzers and VNA/PNA
- Extensive post-processing modules
- Export data with variable formatting options
- Measure up to 1600 frequency points @ every increment
- Variable speed
- Move to max signal position
- Vertical / horizontal scan measurements
- CW/CCW antenna rotation

## Data Processing and Visualization

- Quad-trace polar plots
- Dual-trace amplitude plots
- Compliance overlay
- 3D AZ/EL over freq
- 3D AZ over EL
- Spherical plots
- Calibrated ref antenna import
- Path loss calculator
- Excel or .TXT export
- Complete data manipulation
- Multiple storage registers for convenience

# Product Drawings

## Front View

Units: inches [mm]

# Side View

Units: inches [mm]

## Standard configuration

## Maximum extension

**CAUTION**  
MUST REMOVE WHEELS AND SECURE POSITIONER  
TO UTILIZE MAXIMUM EXTENSION

We recommend bolting the positioner down.
