FlexSorb

New Flexible Absorber, Same Proven Performance

FlexSorb Product Features

- Flexible
- Tips Resist Breakage
- Easier to Handle
- Excellent for:
 - Anechoic Floor Treatments
 - Chamber Entry Ways
 - High Traffic Areas
- Non-Hygroscopic
- Fire Retardant

ETS-Lindgren introduces FlexSorb—an absorber that bends but won't break. It's ideal for high traffic areas like chamber doorways and interior walls, or for tests that require an anechoic floor treatment.

FlexSorb is available as an option for most of our anechoic absorber product line. It provides increased flexibility without affecting reflective performance, power handling capacity, or fire retardant properties. In addition, FlexSorb is non-hygroscopic: its weight does not change in the presence of atmospheric moisture.

For a free sample and to discuss your needs, contact an ETS-Lindgren office, representative or distributor near you. A complete list is available at ets-lindgren.com.

FlexSorb maintains it's shape... *without breaking!*

Bend it!

Twist it!

Crush it!
